# OPAP Arena

NEA FILADELFEIA, GREECE

OPAP Arena serves as the home stadium of AEK Athens FC. With a capacity of 32,500, it is the third-largest football venue in Greece.

Completed in October 2022 at a cost of \$78 million, it was recognized as the Stadium of the Year 2022 by Stadiony.net. Inspired by ancient Greek architecture, the stadium features a double-headed eagle statue and corner towers supporting the roof and floodlights. Construction began in July 2017 and was completed in three phases, with the final phase finishing in September 2022. The stadium hosted its first major event, the 2024 UEFA Europa Conference League final, establishing itself as one of Greece's most modern sports venues.
