

PUBLIC BUILDINGS

# BBC White City Broadcast and Energy Centre

LONDON, UK

- ✓ *Deployment of the smartVES PAVA system*
- ✓ *EN54 Certified*
- ✓ *Additional midiVES compact PAVA system*
- ✓ *5kW total power*

Collaborating closely with our UK client - Innovative Fire & Security, Ambient System proudly provided a PAVA control and amplification rack for the prestigious BBC White City Broadcast and Energy Centre in London.

This installation marked a significant milestone as the inaugural deployment of the smartVES PAVA system within the UK market and across all Ambient System's export markets. The transition to this advanced system went seamlessly with a refurbishment and upgrade of the fire infrastructure. With the smartVES development Ambient System also delivered compact PAVA system midiVES.

*We make everyday life safer*
