

# IP Intercom System

Stay connected, stay safe

We make everyday life safer

# IP Intercom System

The IP Intercom System is a modern and reliable tool for voice communication. Intercom integrated with the building's security systems enable the streamlining of information

flow and a reduction in response time to events. As a key element of communication and security, the system monitors the operational status of connected intercoms, logs

system events, and enables audio recording, ensuring comprehensive operational support.

# System Functions

---

**Enables natural, two-way conversations, including conference calls,** intelligent forwarding and other advanced telecommunication functions.

**Acoustic monitoring of the speaker-microphone path.** The functional test involves the intercom emitting a specific test signal that must be correctly received by its microphone.

**Enables remote control of secure access** by the intercom relay via remote code.

**Continuous monitoring of connected intercoms,** distinguishing between their active status, idle state, and any potential malfunctions.

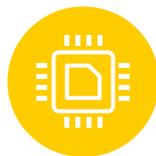

**Enables broadcasting voice messages to all intercoms, selected groups, or individual devices.** Messages can be delivered live by the user or played back from the system's memory.

**The server maintains a detailed log of system operations.** Additionally, for enhanced security and to facilitate the later analysis of events, there is an option to record the content of conversations.

**Extensive capabilities of integration with visualization and management systems** (SCADA, PSIM, BMS, etc.) via SNMP and REST API protocols (with the option of direct connection to the intercom).

**Digital signal processing algorithms ensure high speech intelligibility** even in challenging acoustic environments (reverberation, noise). This includes features such as automatic volume control, echo cancellation, and noise reduction.

# ISE CORE

## INTERCOM SERVER

The ISE CORE server is an advanced communication platform that ensures reliability, performance, and extensive integration capabilities. The system offers the possibility of flexible expansion with advanced functionalities that can be activated at any time. To ensure business continuity, the server provides a redundancy option, both at the platform level (cooperation of two servers)

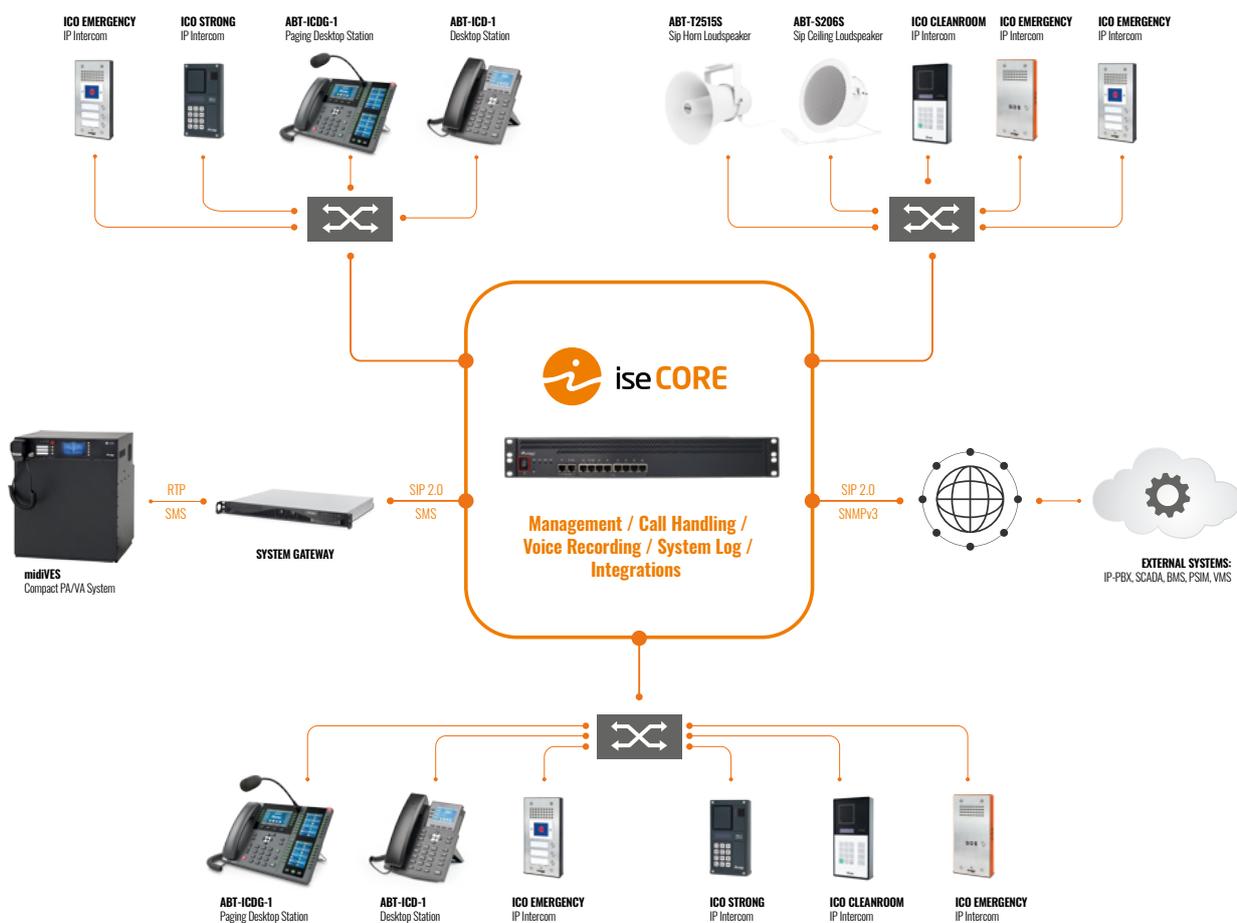

and power redundancy through a built-in battery backup module. Communication is fully encrypted, protecting data from unauthorized access. The system can also be programmed and administered remotely via a web browser.

### CHARACTERISTICS

- » **System Capacity:** The platform supports up to 1000 users and up to 100 simultaneous calls, depending on the license.
- » **Networking:** It is possible to network with other Ambient System intercom systems.
- » **Call Recording:** The function of recording voice channels is available and scalable depending on needs.
- » **Compliance with Standards:** The system meets a number of safety and compatibility standards:
  - › EN 0950-1:2006+A11:2009+A1:2010 +A12:2011+A2:2013
  - › EN 55024:2011
  - › EN 55032:2015
  - › EN 61000-3-2:2014
  - › EN 61000-3-3:2013

ADDITIONAL SERVICES	Description
CoreTTS100	Text-to-speech service for 100 voice announcements within one year from the date of purchase.
CoreTTS1k	Text-to-speech service for 1000 voice announcements within one year from the date of purchase.
CoreUpgSSD	SSD-1TB installation service performed by the factory service center.

	ISE CORE
<b>Physical Parameters</b>	
Min / Max Power Consumption, W	22 / 75
Housing	19" (1.5U x 360 mm)
Power Supply Voltage	~230V, 50Hz
Emergency Battery Power	from 12V/17-100 Ah batteries

LICENSES*	Description
Core200	Base license for launching up to 200 users, including up to 40 simultaneous voice calls.
Core1k	Base license for launching up to 1000 accounts, including up to 100 simultaneous voice calls.
CoreRec-1	License enabling the recording of 1 voice channel.
CoreRec-5	License enabling the recording of 5 simultaneous voice calls.
CoreConf-5	License for 5 simultaneous conference participants.
CoreConf-15	License for 15 simultaneous conference participants.
CoreUser-1	License for 1 user.
CoreUser-10	License for 10 users.
CoreUser-100	License for 100 users.
CoreUserVideo-1	License for 1 user with video calls.
CoreUserVideo-5	License for 5 users with video calls.
CoreRedundancy200	License enabling server redundancy with a Core200 license. Requires the use of an additional ISE CORE server.
CoreRedundancy1k	License enabling server redundancy with a Core1000 license. Requires the use of an additional ISE CORE server.

# ISE VES SYSTEM GATEWAY

## SYSTEM GATEWAY

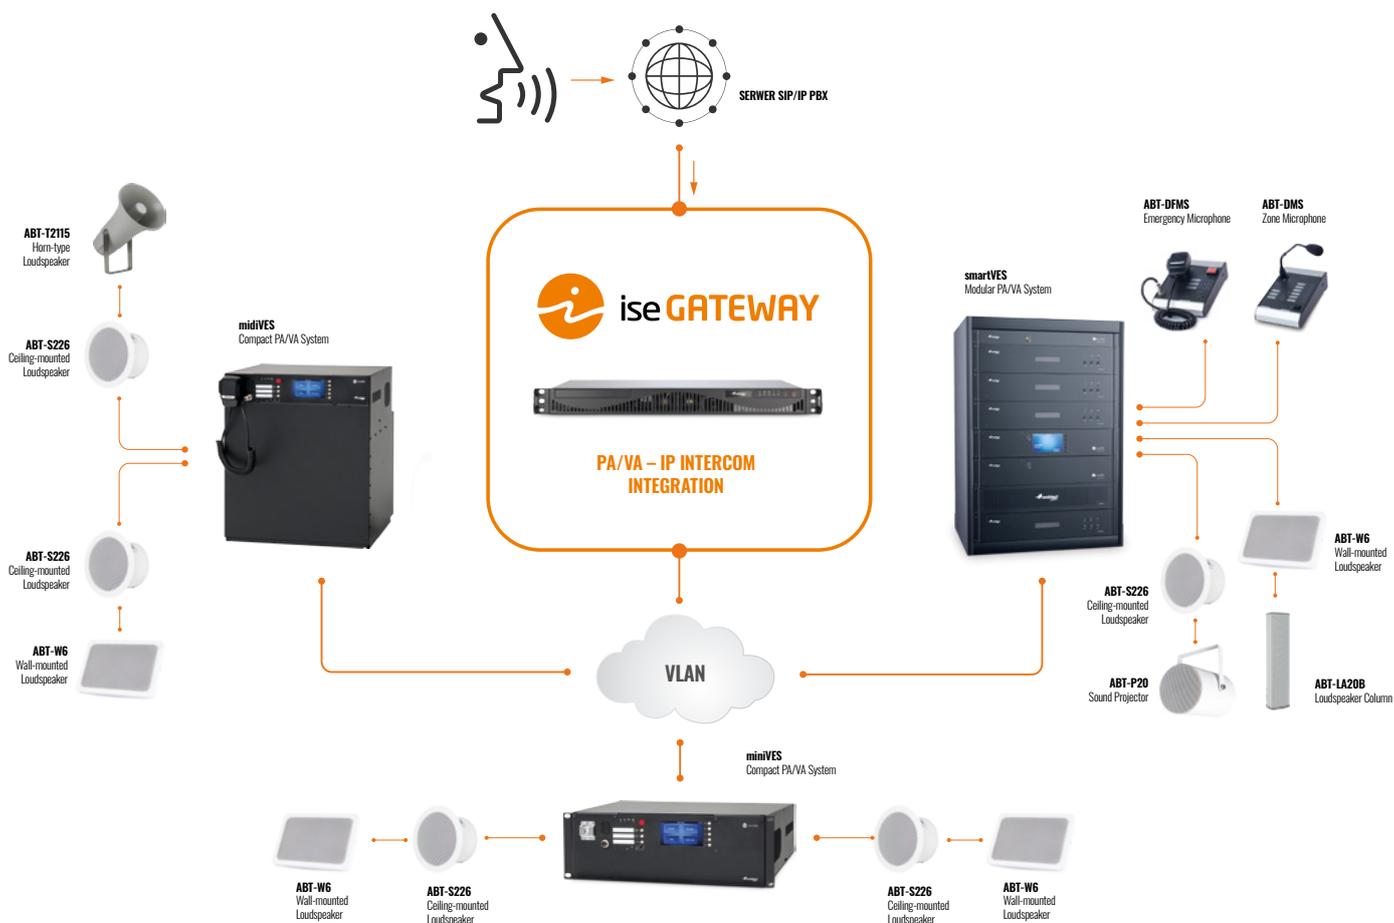

ISE VES SYSTEM GATEWAY is a PAVA exchange server with SIP access functionality. The server enables the integration of distributed PAVA systems into an extensive audio network. It also allows for the integration of said systems with IP telephony systems in the digital domain, utilizing the SIP Trunk feature. ISE VES SYSTEM GATEWAY supports up to 8 simultaneous SIP calls into the PAVA network, allowing to route these calls to selected zones. The server has an incoming call recording functionality for subsequent analysis. It also features

a message player and scheduler, manageable through an intuitive browser interface secured against unauthorized access. Both voice messages and other broadcast functions of the server can be controlled remotely. ISE VES SYSTEM GATEWAY is a solution that enables the efficient distribution of addressed voice messages to the PAVA network from various sources. Thanks to it, IP intercom, IP telephony systems, and service providers can effectively communicate with the Public Address and Voice Alarm system.

### CHARACTERISTICS

- » *Digital integration of VoIP and PAVA systems*
- » *Digital voice announcer with scheduler*
- » *Management via an easy-to-use browser interface*

	ISE VES SYSTEM GATEWAY
Procesor	Intel Xeon
Chipset	Intel
Operating memory	1 × 8 GB
Hard drive	1 × 240 GB SSD
Network	2 × Intel i210 AT Gigabit LAN
Ports	2 × USB 2.0 / 2 × USB 3.0 / 2 × 1 Gbit/s
Dimensions	43 mm (1U) × 437 mm × 290 mm
Operating system	Linux
Power supply	230 V AC or 48 V DC

ISE VES SYSTEM GATEWAY functionality defined within the licensing structure:

LICENSES	Description
SG	Segment License – enables adding connections to Ambient System PAVA subsystem
Z	Zones License – enables the configuration of a broadcast group
SF	Store&Forward License – enables the buffering of messages addressed to busy groups
T	Timer License – enables the creation of an event schedule
P	PBX License – enables the registration of ISE VES SYSTEM GATEWAY in a SIP Proxy
R	Record License – enables the recording of outgoing calls to Ambient System PAVA central units
B	Backup License – enables the configuration of a redundant server
I-APIS	License SYS GW (I-APIS) - APIS server integration

# ICO EMERGENCY

## IP INTERCOM

- ✓ *Intercom with emergency button / RFID reader*
- ✓ *Compliance with DIN EN 50726-1  
VDE 0827-1:2025-06 standard*
- ✓ *Up to 3 programmable buttons*
- ✓ *Vandal-resistant housing IK08/IP54*
- ✓ *Acoustic monitoring of speaker-microphone path*
- ✓ *DSP functions: noise reduction, echo cancellation,  
automatic volume control*
- ✓ *Integrations available via SNMP v3*

ICO EMERGENCY is an emergency intercom designed in accordance with the EN 50726-1 standard, ideal for applications requiring rapid notification. It is equipped with a large, intuitive red emergency button protected by a breakable cover. Activating this button initiates a priority connection with the intercom system operator or the automatic playback of a pre-programmed voice message from the server. The intercom additionally

offers 1 to 3 programmable buttons that can be configured for standard call functions. ICO EMERGENCY has 3 relays and 6 GPIO inputs/outputs, enabling integration with external devices such as strobes, electronic locks, or external buttons. ICO EMERGENCY can transmit information about its status to management systems (PSIM, BMS, etc.) directly, bypassing the SIP server, using the SNMP protocol. Voice communication is

hands-free, utilizing advanced digital algorithms that improve sound quality through noise reduction, automatic volume control, and echo cancellation. ICO EMERGENCY can be powered via PoE or using an external DC power supply. The vandal-resistant housing with IP54/IK08 rating ensures reliability in harsh environmental conditions. Dedicated mounting accessories allow for surface, flush, and drywall mounting.

MODELS	Description
ABT-ICO-EME-B1E	Intercom equipped with a single programmable button
ABT-ICO-EME-B3E	Intercom equipped with three programmable buttons
ABT-ICO-EME-B1RF	Intercom equipped with RFID reader and a single programmable button
ABT-ICO-EME-B3RF	Intercom equipped with RFID reader and three programmable buttons

Dust/water protection	IP54
<b>Physical parameters</b>	
Dimensions (H × W)	137 × 277 mm
Weight	1500 g
Material	Stainless steel

# ICO EMERGENCY S01/S02

## IP INTERCOM WITH HANDSET, DEDICATED FOR TUNNEL APPLICATIONS

- ✓ *Wall-mounted intercom equipped with a handset*
- ✓ *Up to 2 programmable buttons*
- ✓ *Vandal-resistant housing IK10/IP65*
- ✓ *Acoustic monitoring of speaker-microphone path*
- ✓ *DSP functions: noise reduction, echo cancellation, automatic volume control*
- ✓ *Integrations available via SNMP v3*

ICO EMERGENCY S01 and S02 are intercoms specifically designed for applications with very high background noise levels (e.g., ventilation noise, traffic noise). To maximize speech intelligibility, the S02 version is equipped with a handset; lifting it automatically initiates a connection with the operator. The ICO EMERGENCY S01 and S02 housing features high vandal resistance (IK09) and an IP65 protection rating, ensuring reliability in

demanding environmental conditions. Both versions have 2 relays and 6 GPIO inputs/outputs, enabling integration with various external devices such as strobe, electronic locks, and specialized buttons. Additionally, the intercom can autonomously report its status to building management systems (PSIM, BMS, etc.) via the SNMP protocol, without the need to involve the SIP server. This allows for monitoring events such as the opening

of shelter doors, evacuation routes, or the enclosure in which the device is mounted. ICO EMERGENCY S01 and S02 offer flexible mounting options: surface-mounted, flush-mounted, or in drywall constructions. An orange housing variant with 'SOS' markings on the sides is also available, further enhancing its visibility in emergency situations. Both intercoms can be powered via standard PoE or using an external DC power supply.

MODELS	Description

# ICO EMERGENCY S03

## IP INTERCOM FOR PENITENTIARY FACILITIES

- ✓ *Heavy-duty wall-mounted intercom*
- ✓ *Vandal-resistant housing IK10/IP65*
- ✓ *2 programmable buttons*
- ✓ *4 auxiliary buttons*
- ✓ *Acoustic monitoring of speaker-microphone path*
- ✓ *DSP functions: noise reduction, echo cancellation, automatic volume control*
- ✓ *Integrations available via SNMP v3*

ICO EMERGENCY S03 is an intercom dedicated to penitentiary facility applications, where there is a need for increased mechanical resistance and necessity to integrate additional functionalities, such as operating window opening mechanisms, controlling lighting, or managing the public address system. The ICO EMERGENCY S03 housing features high vandal resistance (IK10) and an IP65 protection rating, ensuring reliability in demanding environmental conditions.

It is designed for flush mounting using the dedicated mounting box ABT-IAC-BOX01-F. The front panel of the ICO EMERGENCY S03 is equipped with 2 quick dial buttons and a group of 4 auxiliary buttons. Two buttons are used to operate the integrated multicast radio receiver. The remaining two buttons enable the control of external devices such as the window operator and room lighting. ICO EMERGENCY S03 has 3 relays and 6 GPIO inputs/outputs, enabling integration with

various external devices such as strobe, electronic locks, and specialized buttons. Moreover, ICO EMERGENCY S03 can autonomously transmit information about its status and the status of the aforementioned relays and GPIOs to building management systems (PSIM, BMS, etc.) directly, bypassing the SIP server, using the SNMP protocol. ICO EMERGENCY S03 can be powered via standard PoE or using an external DC power supply.

# ICO FRONTIER

## IP INTERCOM

- ✓ *Basic intercom*
- ✓ *Up to 3 programmable buttons*
- ✓ *Vandal-resistant housing IK08/IP54*
- ✓ *Acoustic monitoring of speaker-microphone path*
- ✓ *DSP functions: noise reduction, echo cancellation, automatic volume control*
- ✓ *Integrations available via SNMP v3*

ICO FRONTIER is a basic intercom type equipped with 1 to 3 programmable buttons used for call functions. It provides high-quality, hands-free voice communication thanks to advanced digital algorithms such as noise reduction, automatic volume control, and echo cancellation. ICO FRONTIER is equipped with 3 relays and 6 GPIO inputs/outputs,

which enables easy integration with various external devices, such as strobes, electronic locks, and external buttons. Moreover, ICO FRONTIER can autonomously report its status to building management systems (PSIM, BMS, etc.) using the SNMP protocol, without the need to involve the SIP server. The robust, vandal-resistant housing with an

IP54/IK08 rating guarantees reliable operation in various environmental conditions. Dedicated mounting accessories allow for flexible surface, flush, or drywall installation. ICO FRONTIER can be powered via standard PoE or using an external DC power supply.

# ICO CLEANROOM

## IP INTERCOM FOR CLEANROOM APPLICATIONS

- ✓ *Intercom for clean rooms*
- ✓ *Antibacterial protective coating*
- ✓ *Resistance to chemical agents PZH hygiene certificate*
- ✓ *Full backlit keypad OLED display*
- ✓ *DSP functions: noise reduction, echo cancellation, automatic volume control*
- ✓ *Integrations available via SNMP v3*

ICO CLEANROOM is an IP intercom dedicated to clean room environments. The device features a housing with an environmental protection rating of IP67 and a front panel secured with a chemical-resistant, antibacterial protective coating, which prevents the accumulation of dirt in crevices and allows the intercom to be cleaned using detergents commonly used in healthcare. The device's properties are confirmed by the Hygiene Certificate of the National Institute of Public

Health PZH. ICO CLEANROOM is adapted for installation in modular wall systems. ICO CLEANROOM is equipped with a hands-free system, a clear 2.23-inch OLED display, and a full functional keypad with a backlight option, which improves button visibility in low light conditions and increases contrast in bright light. The keypad allows for adjusting the display backlight and device volume, as well as selecting entries from the contact book in case communication with personnel

outside the speed dial list is needed. ICO CLEANROOM has 3 relays and 6 GPIO inputs/outputs, enabling integration with various external devices such as strobe, electronic locks, and specialized buttons. ICO CLEANROOM allows for flush mounting, surface mounting, or installation in modular wall systems. The intercom can be powered via standard PoE or using an external DC power supply.

# ICO STRONG

## IP INTERCOM

- ✓ *Intercom for special applications*
- ✓ *Modular design*
- ✓ *Full backlit keypad*
- ✓ *OLED display*
- ✓ *DSP functions: noise reduction, echo cancellation, automatic volume control*
- ✓ *Integrations available via SNMP v3*

ABT-ICO-STR-K

ABT-ICO-STR-B4

ICO STRONG is an intercom dedicated to applications requiring devices with high resistance to external factors. Its housing features vandal resistance at the IP67/IK10 level. ICO STRONG has a modular design. It is standardly equipped with a hands-free system, a 2.23-inch OLED display, and a full functional keypad with a backlight option. It can be further expanded with modules such

as a camera, RFID reader, emergency button, or additional speaker. There is also the possibility to replace the full functional keypad with 1 or 4 quick dial buttons. The device has 3 relays and 6 GPIO inputs/outputs, enabling integration with various external devices such as strobe, electronic locks, and specialized buttons. Furthermore, it has the ability to directly transmit information about

its status to management systems (PSIM, BMS, etc.) bypassing the SIP server, using the SNMP protocol. ICO STRONG can be surface-mounted or flush-mounted (using dedicated mounting accessories). The device is powered via PoE or using an external DC power supply.

# ICO PHP S01/S02

## INFO/SOS HELP POINT INTERCOM

- ✓ Free-standing intercom
- ✓ Vandal-resistant design IK10
- ✓ Protection rating IP65
- ✓ Modular configuration
- ✓ DSP functions: noise reduction, echo cancellation, automatic volume control
- ✓ Integrations available via SNMP v3

ICO-PHP is a free-standing intercom column serving as an emergency call point. It features a vandal-resistant housing with an IK10/IP65 protection rating. ICO-PHP has a modular design. It consists of a free-standing enclosure equipped with an intercom module and additional elements such as a camera, induction loop amplifier, or network switch. The configuration and mechanics of the column can be customized to meet individual customer needs. The ICO-PHP intercom module is equipped with 2 relays and 6 GPIO inputs/outputs, enabling integration with various external devices such as strobe, electronic locks, and specialized buttons. Furthermore, it has the ability to directly transmit information about its status to management systems (PSIM, BMS, etc.) bypassing the SIP server, using the SNMP protocol.

## SIP PAGING UNIT

- ✓ Desktop station with handset and gooseneck microphone
- ✓ 4.3" main display
- ✓ H.264 video codec support
- ✓ Two 3.5" auxiliary displays
- ✓ Programmable buttons
- ✓ Full functional keypad
- ✓ Headset connection possibility
- ✓ Built-in Bluetooth module

ABT-ICDG-1 is an operator console that combines the functionality of an IP phone and a public address desk. It is equipped with a 4.3-inch display, an auxiliary display, a full functional keypad, a block of 32 programmable buttons, a handset for calls, a hands-free system, and a goose-neck microphone. The numeric keypad of the ABT-ICDG-1

allows the operator to select any intercom by entering its assigned number. On the graphic LCD display, the operator can clearly verify the station with which a connection has been established and access additional functions such as settings and the address book. The quick selection button block, located on the right side of the station,

offers programming of 32 physical buttons (a total of 96 logical functions across 3 layers). These can be assigned various tasks, such as selecting a recipient, selecting a zone, and activating voice messages from the server memory.

MODELS	Description
ABT-ICDG-1	Operator console / IP intercom with gooseneck microphone
ABT-ICDG-1B	Operator console / IP intercom with gooseneck microphone; enhanced IK rating

<b>ABT ICDG-1 / ABT ICDG-1B</b>

## DESKTOP INTERCOM

- ✓ *Basic desktop Unit with handset*
- ✓ *2.8" display*
- ✓ *Full functional keypad*
- ✓ *Headset connection possibility*

ABT-IDC-1 is a stylish desktop intercom designed for intuitive call handling and convenient voice announcements. Equipped with a clear 2.8-inch display, a functional keypad, a hands-free mode, and a dedicated

handset, it ensures comfortable communication. Thanks to the graphic LCD display, the ABT-IDC-1 operator has a clear view of the call status and easy access to additional functions such as the address book and device

settings. The intercom enables initiating calls and conducting conversations with any system user, as well as effectively broadcasting voice messages.

## INTELLIGENT IP AMPLIFIER

- ✓ *Audio transmission using SIP, UDP, RTP*
- ✓ *20W power amplifier (Class D)*
- ✓ *Noise tracking capability*
- ✓ *Remote status monitoring*
- ✓ *Reporting via SNMP*
- ✓ *Browser-based configuration and management*

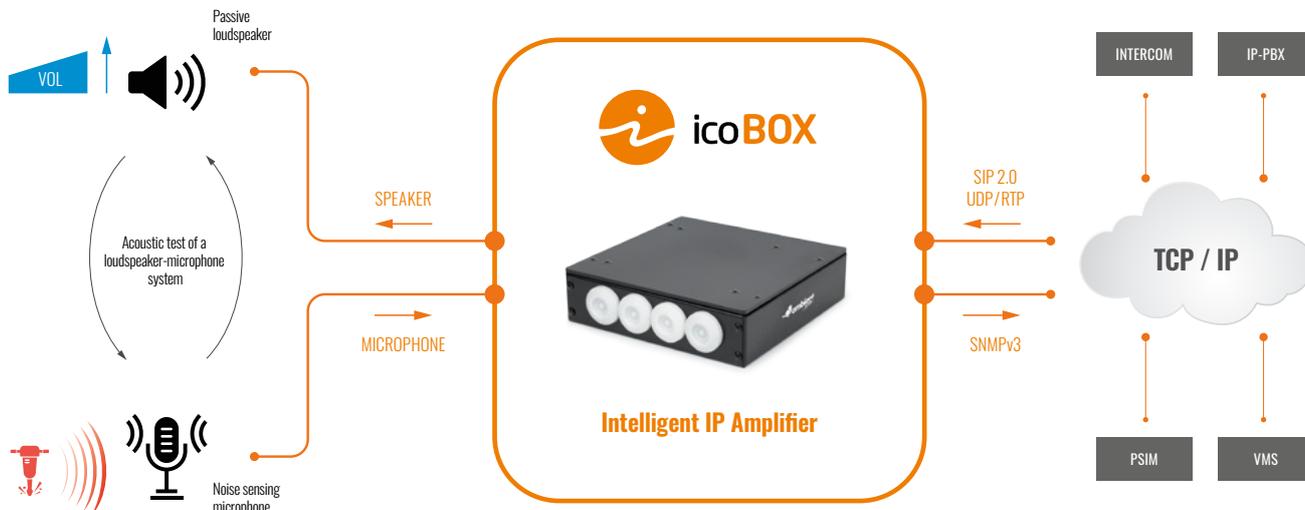

ICO-BOX is an IP network amplifier that enables the integration of conventional loudspeakers into an intercom system. It is equipped with a digital amplifier with rated power of 20W (at 4 Ohms). ICO-BOX is capable of receiving audio signals transmitted using SIP 2.0, RTP, and RAW UDP standards. The device also has a local line input.

ICO-BOX offers a noise tracking function – the level and characteristics of the emitted sound can be automatically adjusted to the ambient noise level measured by a connected microphone. This improves the intelligibility of the reproduced speech. ICO-BOX has advanced mechanisms for monitoring its operational status, including acoustic control

of the correct functioning of the loudspeaker-microphone system. The device status can be reported to external management systems using the SNMP protocol. The configuration of ICO-BOX is done remotely via an intuitive web interface.

MODELS	Description
ABT-ICO-BOX	Network amplifier with noise tracking function

ICO BOX	
<b>Audio</b>	
Amplifier	20W, Class D
Local input	1 × balanced line input, 20 kOhm, nominal level 775 mV RMS
Sensor input	1 × microphone input, 100 kOhm, 2V Phantom Power
<b>Interfaces</b>	
Ethernet ports	2 Ethernet ports
Protocols	SIP2.0, RTP, RAW UDP, SNMP, HTTP
<b>Power supply</b>	
PoE	PoE: IEEE 802.3af / class 0, IEEE 802.3at / max. 12,95W
DC	External DC adapter - 12V / 2A (option)
<b>Environmental parameters</b>	
Operating temperature	-40 to +65°C
Relative Humidity	10% to 95% (non-condensation)
Dust/water protection	IP30
<b>Physical parameters</b>	
Material	Aluminum
Weight	400g
Dimensions (W x H x D)	50 × 140 × 120 mm

# ABT-S206S

## SIP CEILING LOUDSPEAKER

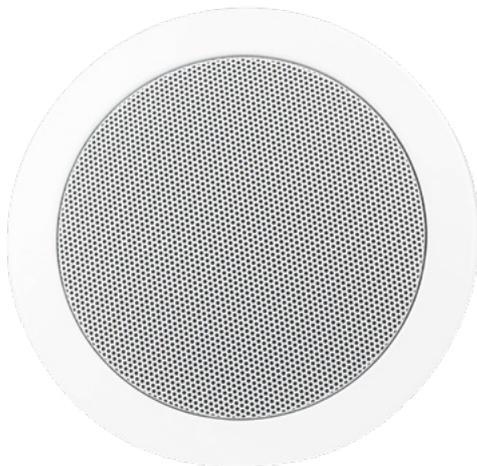

- ✓ *Powered ceiling loudspeaker*
- ✓ *Quick and simple installation*

The ABT-S206S is a SIP recessed ceiling loudspeaker with built-in amplifier. The loudspeaker can be powered via PoE

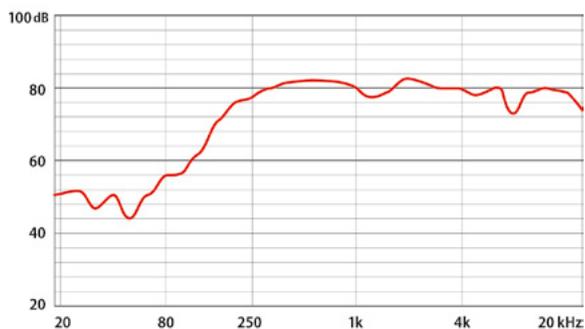

or using a DC adapter. It is dedicated for security and safety applications, allowing it to interface to intercom systems, PSIM

software, VMS, CCTV systems and other, directly via TCP/IP network.

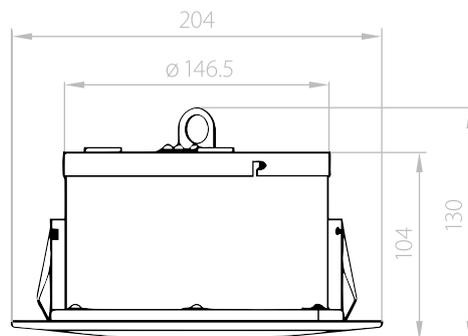

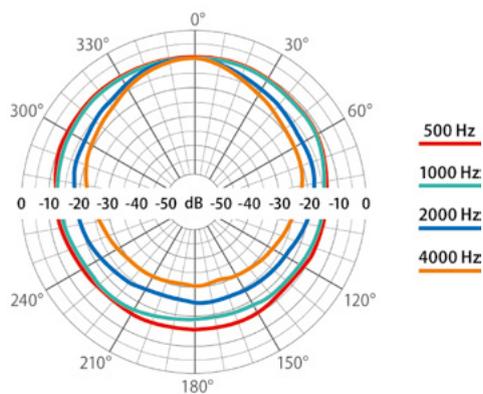

ABT-S206S	
<b>Electrical</b>	
Rated power	6 W
Network interface	10/100BASE-TX, RJ45
Power supply	DC 12–24 V or POE
Decoding mode	Max. 48 kHz, 320 kbps audio stream, support MP3, G.711 a/u, G.722. min. delay: 50 ms
Effective frequency range	120 Hz – 20 000 Hz
Dispersion at 1 kHz	180°
SPL (6W @ 1 m)	99 dB
<b>Environmental</b>	
IP rating	IP32
Min./max. ambient temperature	-20°C / 55°C
<b>Mechanical</b>	
Dimensions	Height 130 mm, ø 204 mm
Net Weight	1,1 kg
Colour	White (RAL 9003)
Material	Steel
Mounting	Spring clamp
<b>Accessories</b>	
Power supply	12VDC / 2 A / 24W

## SIP WALL-MOUNTED LOUDSPEAKER

- ✓ *Powered cabinet loudspeaker*
- ✓ *Suitable for wall and ceiling installation*

The ABT-W6S is a cabinet loudspeaker with a metal enclosure. The loudspeaker is designed for on-wall and/or on-ceiling installation, with the option for recessed installation (using an accessory bracket). The loudspeaker is fitted with a built-in power amplifier and SIP module, allowing it to interface directly with SIP-based life safety and security systems.

## SIP HORN LOUDSPEAKER WITH BUILT-IN 15 W AMPLIFIER

- ✓ High sound pressure level
- ✓ Aluminium housing
- ✓ Protection from dust and humidity:  
IP65 rating

ABT-T2515S is a SIP horn loudspeaker with a built-in 15 W amplifier. It can be powered by PoE that allows to easily connect it to existing local area networks using one CAT5/CAT6 cable connection. It is an ideal choice for applications in security systems,

industrial and commercial systems in both outdoor and indoor areas such as train stations, airports, parking lots, parks, gardens, corridors and much more. The high efficiency and directionality of the loudspeaker allow broadcasting voice messages

directly to even distant places, while ensuring a high sound pressure level. The aluminium housing guarantees increased resistance to adverse weather conditions provided by the IP65 rating.

**ABT-T2515S**

**Electrical**

Rated power of amplifier	15 W
Network interface	10/100BASE-TX, RJ45
Power supply	DC 12 – 24 V or POE
Decoding mode	Stereo playing, max. 48 kHz, 320 kbps audio stream, support MP3, WAV (PCM +IMA ADPCM), G.711 a/u, G.722., min. delay: 50 ms
Encoding mode	G.711a/u, G.722 and RTP mode, min. delay: 30 ms
Effective frequency range	350 Hz – 7 kHz
Dispersion at 1 kHz	110°
SPL (15W @ 1 m)	111 dB

**Environmental**

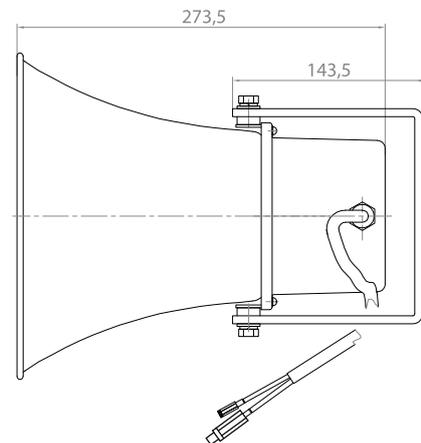

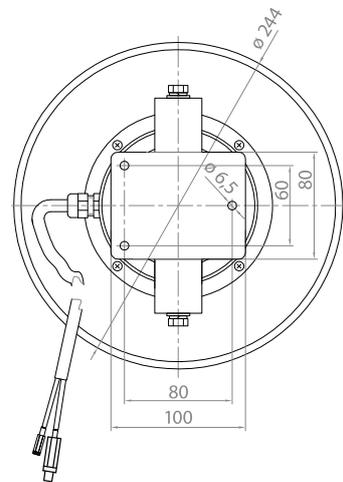

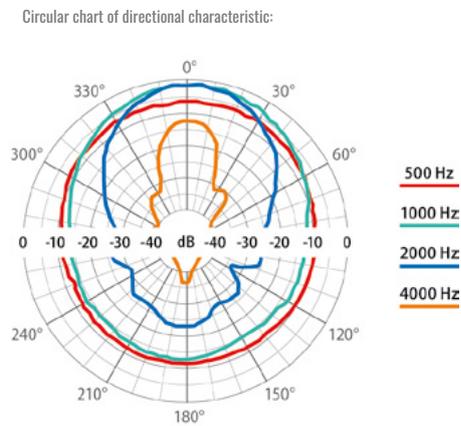

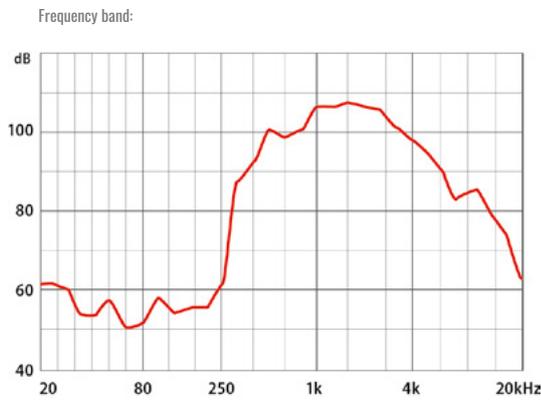

IP rating	IP65
Min./max. ambient temperature	-20°C / 55°C

**Mechanical**

Dimensions	250 × 320 mm
Net weight	2,3 kg
Colour	Light grey (RAL 7035)
Material	Aluminium
Mounting	U type bracket

**Accessories**

Power Supply	12VDC / 2 A / 24W
