

PAVA Solutions for hospitals

- ✓ **Safety and efficiency** – Critical communication for medical facilities
- ✓ Ambient System's comprehensive **solutions for healthcare**

Why Ambient System is the right choice for your project?

Ambient System's PAVA and intercom solutions are designed for demanding environments such as hospitals, clinics and medical centers. With EN 54 compliance, IP architecture and integration capabilities with BMS systems, Ambient System ensures not only safety but also operational comfort and efficiency. It's technology that supports medical staff in daily work and protects patient lives.

SAFETY AND EFFICIENCY – CRITICAL COMMUNICATION FOR MEDICAL FACILITIES

Reliable communication and advanced Voice Alarm Systems are fundamental to ensuring safety and efficient operations within modern healthcare facilities. Modern healthcare demands communication systems that prioritize patient safety. PAVA systems and IP intercoms are essential for efficient functioning and rapid response in critical situations. They deliver intelligible announcements for daily operations and serve as a vital tool for mass notification during emergencies like evacuations.

AMBIENT SYSTEM'S COMPREHENSIVE SOLUTIONS FOR HEALTHCARE

Ambient System's solution for medical facilities is based on the smartVES PAVA system, specialized IP intercoms and certified EN-54 loudspeakers.

smartVES PAVA System: Flexible, modular and IP-based design, ideal for integration into hospital infrastructure. Ensures clear audio in operating theaters, patient rooms and waiting areas. Paired with EN-54 compliant loudspeakers, it guarantees optimal sound even in challenging acoustic conditions.

Specialized IP Intercoms: Units designed for operating theaters and cleanrooms enable hands-free, two-way communication, meeting the highest hygiene standards.

This comprehensive approach guarantees that every crucial message reaches its target audience exactly when it matters most, increasing patient safety and staff efficiency.
