

SPORTS FACILITIES

# Football Stadium

**OPOLE, POLAND**

The new stadium has a capacity of 11,600 seats. Underneath three of the stands are facilities for players, offices, food and beverage points, and restrooms.

The first floor features VIP lounges and conference rooms. The entire VIP stand offers 712 seats. The project was carried out by the Municipal Enterprise in Opole, which also manages the facility, with Mirbud serving as the contractor. The stadium is the first “green stadium” in Poland, equipped with photovoltaic systems, heat pumps, and cogeneration units, which help reduce operating costs. Collected rainwater is stored in four tanks under the east stand and used for watering the pitch. The venue is also designed to host concerts and other large-scale and business events.

**MULTIVES**
