# Santander UK bank HQ

LONDON, UK

Working in conjunction with our UK customer, Crane Communications, Ambient System has supplied a new PA/VA control and amplification rack for the Santander UK bank HQ in Triton Sq, London.

The changeover to a new system was completed during a general refurbishment and upgrade to the fire system. The MULTIVES system has a capacity of 4500w of power split over 10 separately addressable zones from two fire command points.

Ken Burns from Crane Communications said: "It was a pleasure working with Ambient System on this project, and everything from design and delivery through to commissioning support went by very smoothly".

Neil Voce of Ambient System confirmed: "It's good to be working on a prestigious project for Santander with Crane and we look forward to the next one!"

## SOLUTIONS PROVIDED

- » 1 PAVA Rack
- » 36 speaker lines
- » 4.6 kW total power

We make everyday life safer
